Professional Summary

Electronics and Communication Engineering graduate with strong skills in Full Stack Development using React.js, Node.js, Express.js, and SQL. Experienced in building scalable web applications, RESTful APIs, and AI-powered solutions with hands-on knowledge of JavaScript, Python, authentication, and database management. Passionate about developing efficient, user-centric software and eager to contribute as a Software or Full Stack Developer.

Experience

AIML Intern, Ernet India	05/2025 – 06/2025 Chennai
• Worked with patient medical datasets involving diagnostic images such as X-rays and medical scans using RadiAnt imaging software. • Performed medical image visualization, data handling, and analysis to support healthcare related workflows. • Assisted in preprocessing, interpretation, and evaluation of medical imaging data for analytical applications. • Gained hands-on exposure to healthcare AI workflows, medical imaging tools, and diagnostic data analysis.	

Education

Bachelor of Engineering in Electronics and Communication Engineering, Jeppiaar Institute of Technology CGPA: 8.0	05/2026 Chennai
---	--------------------

Skills

Programming Python, JavaScript, SQL	Frontend React.js, HTML, CSS, Tailwind CSS
Backend Node.js, Flask, REST APIs	AI/ML Generative AI, LangChain, LangGraph, RAG, NumPy, Pandas
Tools & Platforms Linux(Ubuntu), Git, GitHub, Postman, VS Code, Power BI	

Projects

AI-Powered Voice Interview Assistant, Flask, Gemini AI, LangChain, AssemblyAI, Murf AI • Developed an AI-driven mock interview platform enabling real-time voice-based technical interviews with automated candidate evaluation. • Integrated Gemini AI, AssemblyAI Speech-to-Text, and Murf Text-to-Speech to create an end-to-end conversational interview workflow. • Built RESTful APIs using Flask for interview management, audio processing, feedback generation, and session handling. • Implemented adaptive AI questioning and automated performance analysis using LangChain and LangGraph orchestration	
AI-Powered GitHub Code Review Assistant, <i>React.js, TypeScript, Node.js, Express.js, PostgreSQL (Neon), GitHub OAuth, Google Gemini AI</i> • Developed an AI-powered GitHub Code Review Assistant that enables developers to authenticate via GitHub OAuth, analyze repositories, and receive AI-generated code quality, security, and performance recommendations. • Integrated GitHub REST API and Google Gemini AI to retrieve repository source code, perform intelligent code analysis, and generate automated review feedback with actionable improvement suggestions. • Built scalable RESTful APIs using Node.js, Express.js, and TypeScript for authentication, repository management, AI review processing, and secure session handling using JWT-based authentication. • Implemented repository file filtering, intelligent code chunking using LangChain Text Splitters, and Prisma ORM with PostgreSQL (Neon) to efficiently process large codebases and ensure secure, type-safe database operations.	

Certificates

- Python Programming
- Introduction to Databases
- JavaScript Essentials
