Professional Summary

Electronics and Communication Engineering graduate with strong foundations in Python, SQL, Machine Learning, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and LangChain. Built AI-powered applications using Generative AI technologies through hands-on projects and possess a keen interest in developing scalable and intelligent solutions.

Experience

AIML Intern, Ernet India	05/2025 – 06/2025 Chennai
• Worked with patient medical datasets involving diagnostic images such as X-rays and medical scans using RadiAnt imaging software. • Performed medical image visualization, data handling, and analysis to support healthcare related workflows. • Assisted in preprocessing, interpretation, and evaluation of medical imaging data for analytical applications. • Gained hands-on exposure to healthcare AI workflows, medical imaging tools, and diagnostic data analysis.	

Education

Bachelor of Engineering in Electronics and Communication Engineering, Jeppiaar Institute of Technology CGPA: 8.0	05/2026 Chennai
---	--------------------

Skills

Programming Python, JavaScript, SQL	Frontend React.js, HTML, CSS, Tailwind CSS
Backend Flask, REST APIs	AI/ML Generative AI, LangChain, LangGraph, RAG, NumPy, Pandas
Tools & Platforms Linux(Ubuntu), Git, GitHub, Postman, VS Code, Power BI, Tableau	

Projects

Persona-Based AI Support Agent, Python, LangChain, ChromaDB, Gemini API, Streamlit • Developed a Persona-Based AI Support Agent using RAG, LangChain, and ChromaDB for semantic document retrieval and context-aware responses. • Implemented persona detection and used Sentence Transformers (all-MiniLM-L6-v2) for embedding generation and similarity search. • Integrated Gemini API and designed a human escalation mechanism with support ticket generation. • Built and deployed a ChatGPT-style Streamlit application with chat history, feedback system, and secure API key management.	
AI-Powered Voice Interview Assistant, Flask, Gemini AI, LangChain, AssemblyAI, Murf AI • Developed an AI-driven mock interview platform enabling real-time voice-based technical interviews with automated candidate evaluation. • Integrated Gemini AI, AssemblyAI Speech-to-Text, and Murf Text-to-Speech to create an end-to-end conversational interview workflow. • Built RESTful APIs using Flask for interview management, audio processing, feedback generation, and session handling. • Implemented adaptive AI questioning and automated performance analysis using LangChain and LangGraph orchestration.	

Certificates
